HISTORY

Revolutionizing HVAC for over 100 years.

As an HVAC leader since 1885, Trane is innovative enough to provide the Eurotunnel a 33% energy savings across 31 miles under the sea, and is trusted by 10M+ households.

1913

The Trane Company begins heating innovation, started by James Trane and his son, Reuben.

1931

Trane becomes a pioneer in air conditioning when the first system improves cooling efficiency and reliability.

1984

The company introduces the first high-efficiency gas furnace, providing greater energy efficiency and savings for homeowners.

2008

The EarthWise™ Hybrid Dual Fuel System launches and pairs a high-efficiency heat pump and gas furnace for maximum comfort and performance.

2017

Trane introduces built-in smart home access and automation technology for improved residential energy efficiency.

EXPERT NETWORK

10K HVAC experts at your service.

As America's Most Trusted® HVAC brand¹, Trane delivers cutting-edge technology and fast, reliable service for home comfort when you need it most.
